a - 0.25 not to be exceeded more than two times in any 7 consecutive days.

b - Not to be exceeded on more than 1.0 days per calendar year as determined under the conditions indicated in Chapter 173-475 WAC.

- ppm = parts per million
- µg/m³ = micrograms per cubic meter
- Annual Standards never to be exceeded, short-term standards not to be exceeded more than once per year unless noted.

***Please note:** Primary standards are listed in this table as they appear in the federal regulations, ambient concentrations are rounded using the next higher decimal place to determine whether a standard has been exceeded. The data charts in this report are shown with these unrounded numbers.

Stations Exceeding the Standard

Carbon Monoxide (8-hour standard = 9.5 ppm)

There were 4 exceedances of the carbon monoxide standard during 1996, recorded at one station in Yakima and two stations in Spokane.

Station 3996002A, Yakima, Jade Tree	02/07/96	9.5, 10.5
Station 3278044A, Spokane, 3 rd Ave	02/12/96	9.6
Station 3278039A, Spokane, Hamilton	12/30/96	10.0

Particulate Matter/PM₁₀ (24-hour standard = 150 µg/m³)

There were two exceedances of the PM₁₀ standard during 1996, recorded at two stations located in Spokane and Colville.

Station 3278009E, Spokane, Crown Z	8/30/96	186
Station 3316004A, Colville	12/17/96	236

Visibility Monitoring

Ecology, in cooperation with the National Park Service and the U.S. Forest Service, monitors visibility conditions in Washington's Class I areas during the summer months. Class I areas are areas that are given more stringent air quality protection than other areas of the state (see map). Although monitoring is generally conducted from early June through late October, the period of most concern is July 4 through Labor Day. This "visibility protection period" coincides with the period of heaviest visitation to the Class I areas of the state.

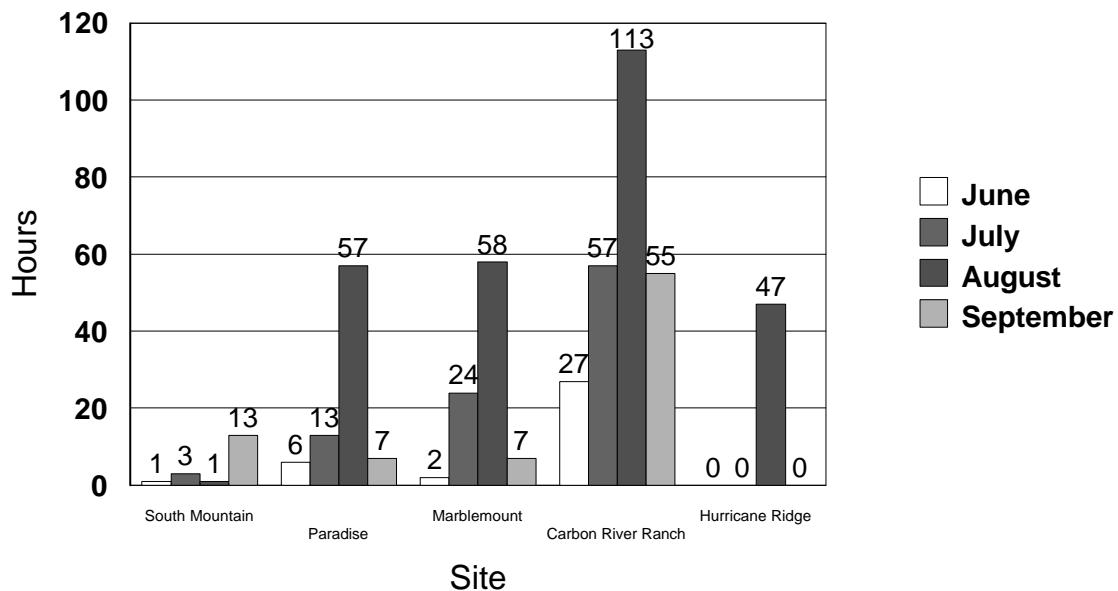

Visibility monitoring for the 1996 season involved the operation of five nephelometer sites in western Washington. Sites operated were South Mountain, Paradise Visitor Center, Carbon River Ranch, Marblemount, and Hurricane Ridge (see map for site locations).

Data from these sites is presented in the graphs on pages 11-14.
